

# COVID 19 – Inpatient Categories:

**General Principle:** Transfer to other hospitals should only be considered when CPH APU is at 85% capacity or higher.

CATEGORY:	CHARACTERISTICS:	DISPOSITION:
1	Lab confirmed diagnosis of COVID 19 with acute complications requiring active treatment	Admit (or transfer) to CPH APU. If higher level of care is required, arrange transfer to appropriate facility
2	Lab confirmed COVID 19, with other primary diagnosis <i>and</i> without acute COVID related complications that require active treatment	-May remain at facility where patient originally presented if bed/staffing available. -May be considered for transfer to MH/GH from CPH ER if bed/staffing available
3	COVID 19 patient who has completed isolation and is no longer requiring active management of COVID-related complications	-May be considered for transfer to MH/GH from CPH APU (or ER) if bed/staffing available -SWING eligible patients should go to GH
